

**AMENDMENTS TO THE SPECIFICATION**

Please amend paragraph [0061] as follows:

[0061] Furthermore, the dielectric body 31 has a combiner 35, which is connected to the electrical connecting element 4. The combiner 35 is used for coupling the coupling ~~points~~structure elements 24 and 25 as well as 84 and 85 in Figures 2 and 3, respectively. The combiner 35 in this case couples the structure elements by means of capacitors or coils to a coupling point 36.

A substitute specification and abstract is being submitted with this response.
